Minor-RWS-P/CF with PU edge.

Sponda in PU.
PU edge.

AFOCAB-RWS:
cabina afonica e paraspruzzi,
completa di raccordo per lo scarico
continuo acque.
soundproof and sprinkle cabin,
complete with piping fitting to
discharge waste-water in
continuous.

An essential and functional desing, as a tradition.

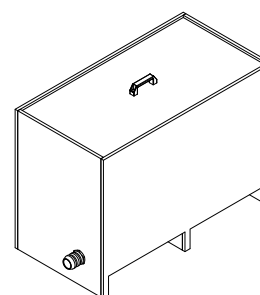

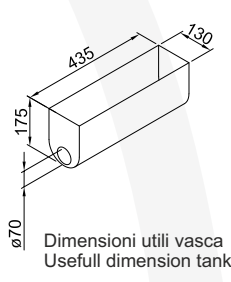

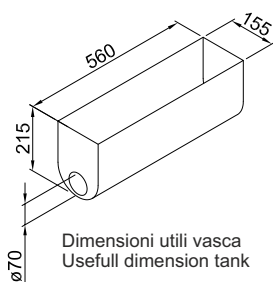

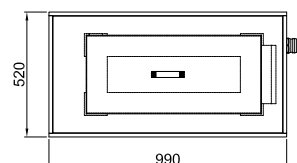

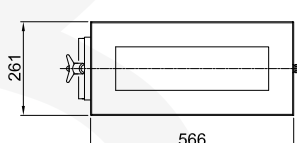

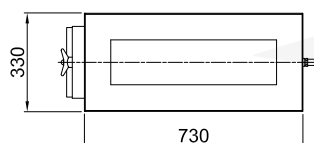

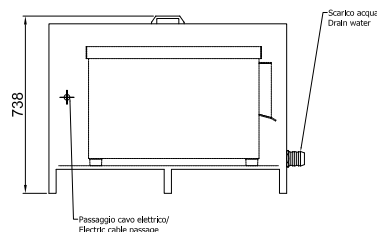

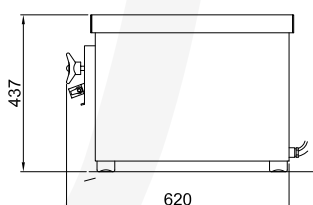

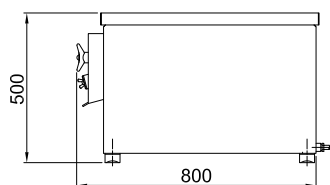

The series **Minor** is the result of a design tested along the time, having produced thousands of reliable machines, with high vibratory frequency (3.000 Rpm), with an exuberant centrifugal force development, designed for hi-tech ball-burnishing. In the table (see next page) are reported the two available capacities of this series in several combinations of accessories and versions. In other words the series **Minor** is an excellent investment, the return of value in the time is often much higher than the expectations. The anti-sprinkle and sound proof cabin AFOCAB-RWS is made of HDPE material.

"E" - Interruttore magnetotermico limitato alle funzioni di marcia e arresto, con protezione termica del motorvibratore;
 "E" – magnetothermal switch with start and stop functions, with thermic protection of the motorvibratore;

"MP-GM" - Quadro comandi dotato di microprocessore, Inverter, tastierino con tasti funzione, potenziometro per la regolazione della velocità, display e tasto di marcia/arresto, interruttore generale e di emergenza (Rosso/Giallo).
 "MP-GM" - Control board equipped with microprocessor, inverter, functional keypad, potentiometer for speed control, display and start/stop button, main and emergency (red/yellow) switch.
